

ROCK XTREME®

FOR BIT, SMALLER HAMMER, BIGGER IMPACT

Who says the next big thing in drilling can't be small?

Center Rock's Rock Xtreme® bits and hammers deliver undisputable performance and profitability in even the most challenging operating conditions.

Our bits – with 50% more actual spline area and no exhaust tube – weigh up to 60% less versus competitive offerings. That means optimum economy, reliability, and durability... and far less rig vibration during drilling, drastically reducing your downtime labor and replacement part costs!

Center Rock Inc.

Our technology optimizes your impact.
