

MINING LP DRILLS®

CENTER ROCK, INC. RAISE BORE LOW PROFILE (LP) DRILL

CRI's High Tech Low Profile Drills Meet the Toughest Demands!

- 22" (558.8 mm) and larger in diameter.
- Push or Pull Applications.
- Bits are free to spin which helps to maintain gage of bore and also reduces wear on bits.
- Hammers and bits are easily accessible for service work.
- Complete service package with each tool.
- Each Mining LP Drill® is fitted with a group of 6" class hammers and 7.88" (200 mm) bits. The size of the bore will determine the numbers of hammers for each canister.
- Air consumption requirements, 400-500 CFM per hammer. Example a 30" (762 mm) LP has three hammers requiring a minimum of 1200 CFM.
- Each hammer is easily accessible, by removing the LP bolt and removing the hammer from the canister.
- Trained technicians to assist with the startup of each LP for proper tooling techniques.
- Service is available to our customers, 24/7.

ACCESSORIES

Low Profile Drill Breakout Stand

Specially designed breakout stand for quick bit changes and easy hammer maintenance or repair, on or off site.

Rock Drill Oil Injection System

The oil injection system is a self contained, air-actuated positive displacement system. It comes equipped with either a 7 gallon reservoir with sight glass infinitely variable from 0-1 GPH or a 22 gallon reservoir with sight glass infinitely variable from 0-4 GPH. Biodegradable is also available which meets all EPA standards for biodegradability. Available in 55-gallon drums and five gallon buckets.

Water Injection System

Ideal system for dust control. This unit is equipped with a 14.5 HP drive engine and a triple piston pump that puts out 3 to 22 GPM. Complete with electric start, mounted in a guarded frame, and supplied with 1.5" inlet and 1" discharge hose.
