

ROCK XTREME®

SMALLER BIT, SHORTER HAMMER, BIGGER IMPACT

Who says the next big thing in drilling can't be small?

Center Rock's Rock Xtreme® bits and hammers deliver undisputable performance in the most challenging conditions. A high frequency air cycle has been incorporated into a short, lightweight hammer to give drillers the ultimate in productivity. RX bits have 50% more actual spline area and no exhaust tube and weigh up to 60% less versus competitive offerings. That means optimum economy, reliability, and durability driving greater profitability to the bottom line.
